Okay, thanks. I'll be in touch shortly on those timing windows. I'll need to connect with a couple colleagues who are out today, but back in next week.

Have a good weekend!

Thanks Robert. Because the companies are pretty flexible on timing it's probably easier if you give us some windows of opportunities and we can go from there. They will try to accommodate your schedule but just need some lead time. Thanks!

Hi Mike-

I'm following up on my email on Weds. We are interested in the site visits and would like to see as much as we are able to help further inform us about the plant operations

and to support the information we've been provided on the diaphragms manufacture, use and disposal. It will likely be myself and another one or two folks making the site visits. What are some upcoming dates that would work for you?

-Robert

Subject: Facility visits

Robert, I wanted to follow up on the question your team asked about facility visits. Both Olin and Occidental have agreed to a facility visit. The companies have offered sites in Louisiana (Plaquemine and Taft), and the two site visits are doable in a full but long day. These would likely require flying into New Orleans (American offers a non-stop), and out of Baton Rouge (American one-stop in Dallas). A potential itinerary would be to visit Occidental's Taft site first, then go up LA Route 1 North to Olin's Plaquemine facilities. I would note that the asbestos handling areas in the plants are not accessible by visitors (since only non-contract employees of the companies have such access for obvious reasons). If you could let me know if there is still interest in having these visits, and some suggested dates, I can put you in direct contact with the companies to handle the arrangements from there.

The companies are very close to getting you all some additional information as we discussed in our meeting, but I don't have a specific date on which to expect that.

Please let me know if we can be of assistance in the interim. Regards, Mike
